

YKHC Pharmacy, Clinics, and Health Aides will *no longer* be taking back old medications.

Outdated medications can be dangerous! Discard of old medications properly. Follow our simple check list below. For additional questions, please talk to your local pharmacist.

Discard your old medications safely!

- Keep medicines in the original container, labels contain safety information.
- Mark out personal information such as your name/address.
- Place liquids in a plastic sealable bag in case it leaks or breaks.
- Mix liquid medicines with undesirable materials like coffee grounds, cat litter, or dirt.
- Mix pills with water, then add coffee grounds, cat litter, or dirt.
- Unneeded medication patches should be opened and folded with the sticky sides touching one another. Wrap in tape and discard in a container that you can't see through.

Remember: Seal and Conseal. Make your expired medications undesirable to others.

When in doubt...talk to your pharmacist!

WARNING: Unused medications can become a target of theft or can be found by children or pets. Dispose of medications properly!
