

# COVID-19

## Situational Report

**Customers, partners, and employees:** YKHC is here for you and your family. YKHC is making decisions related to COVID-19 based on guidance from the CDC, the State of Alaska and other experts. We are erring on the side of caution and in the best interests of our employees, customers and communities.

YKHC is publishing a situational report to provide an update on our COVID-19 response and planning. Here is this week's report.

### Testing Update

As of 11 a.m. July 17, YKHC has performed 7,843 tests — 7,334 are negative and about 475 are pending. Three specimens were rejected by a private lab. YKHC has tested individuals in more than 32 communities in our service area, including Bethel.

- YKHC has confirmed or identified a total of 27 positive COVID-19 cases in Bethel and the YK Delta. 10 of the 27 cases were residents tested out-of-region, but per State reporting protocols, will be counted as YK Delta cases. 7 of these 27 total cases are non-residents. Therefore, per State reporting protocols, the official State YK Delta case count will remain at 20.
- Every Wednesday from noon-4:00 p.m. YKHC is offering COVID-19 testing **without** appointment at the drive-thru testing site in Bethel. Testing at this site is available Monday, Tuesday, Thursday, and Friday, but by appointment only. Individuals concerned with COVID-19-related symptoms can call 543-6949 to be assisted. Testing continues to be available at YKHC village clinics. Customers simply need to call the clinic to be assisted.
- All new positive COVID-19 cases identified and known in the YK Delta are reported on YKHC's website at: <https://www.ykhc.org/covid-19/news/>

### Recoveries

- Cases are considered recovered either through serial testing or time.
  - › For serial testing, if an individual has been symptomatic, they must receive 2 negative PCR tests more than 24 hours apart after symptoms resolve to be cleared. If they are asymptomatic, they must receive a negative PCR test after the initial test.
  - › For time, an individual who has been symptomatic is considered recovered when 10 days have elapsed from when symptoms began, symptoms show improvement, and an additional 3 days have elapsed since their last fever. If asymptomatic, an individual is considered recovered 10 days from their last test.
- Of the total 27 confirmed or known positives cases in the YK Delta, YKHC is managing contact tracing and follow-up testing for 20 of these cases — as they were identified in-region or considered infectious while here. 24 of these 27 cases are considered recovered, with 3 remaining active. 10 of these cases were either identified out-of-region or were not infectious while here.

### Situation Report

- On July 11, YKHC confirmed two new COVID-19 cases in the YK Delta. **Case 1:** YKHC was notified that an individual who resides in a service area village tested positive for COVID-19 while in Anchorage. The individual is currently self-isolating in Anchorage. Contact tracing reveals the individual was not in the YK Delta during the period of time they would have been exposed to or considered infectious for COVID-19. **Case 2:** YKHC confirmed a positive COVID-19 case of a Bethel resident identified through testing of inbound passengers at the Bethel airport. The individual is currently self-isolating and YKHC is working with the Alaska Section of Epidemiology to conduct contact tracing and follow-up testing. More here: <https://www.ykhc.org/two-new-covid19-cases-july11/>
- On July 12, YKHC was notified that an individual who resides in a YKHC service area village tested positive for COVID-19 while in Anchorage. While the individual has been out of region for over two weeks, per State reporting protocols, the positive case will be counted as a YK Delta case. Contact tracing reveals the individual was not in the YK Delta during the period of time they would have been exposed to or considered infectious for COVID-19. More on this case here: <https://www.ykhc.org/one-new-covid-19-case-july12/>
- On July 14, YKHC confirmed two new COVID-19 cases in the YK Delta. YKHC is working with the State of Alaska Section of Epidemiology to conduct contact tracing, follow-up testing, and ensure precautions are taken to protect people the individuals may have been in close contact with. **Case 1:** YKHC confirmed an individual who resides in a YKHC service area village tested positive for COVID-19. The individual was identified through testing of inbound passengers at the Bethel airport. The individual is currently self-isolating. **Case 2:** YKHC confirmed an additional COVID-19 case in Bethel of an individual tested in accordance with Health Mandate 18. The individual is not a resident of the YK Delta and, therefore per State reporting protocols, will not be counted in the YK Delta positive case count. The individual is currently self-isolating.
