

COVID-19

Situational Report

Customers, partners, and employees: YKHC is here for you and your family. YKHC is making decisions related to COVID-19 based on guidance from the CDC, the State of Alaska and other experts. We are erring on the side of caution and in the best interests of our employees, customers and communities. YKHC is publishing a situational report to provide an update on our COVID-19 response and planning. [Here is this week's report.](#)

Testing Update

As of 12 p.m. July 16, YKHC has performed 90,860 tests — 85,344 are negative and about 41 are pending. Three specimens were rejected by a private lab.

- COVID-19 testing is available in Bethel on the first floor of the hospital between 8 a.m. and 6 p.m., Monday through Friday. Patients should enter through the main hospital doors (not the emergency room entrance) and indicate they are interested in a COVID test. “Close contacts” and people showing symptoms of COVID-19 can schedule testing by calling 543-6949. In villages, please call your local clinic.

Positive Case Count

- As of July 15, YKHC confirmed a total of 5,511 positive COVID-19 cases in the YK Delta.
 - 52 of these total cases were residents tested out-of-region or were not infectious while here, but per State reporting protocols, will be counted as YK Delta cases.
 - 56 of these total cases are non-residents, so per State reporting protocols, the official State YK Delta case count will remain at 5,456.
- All new positive COVID-19 cases identified and known in the YK Delta are reported on YKHC’s website at: <https://www.ykhc.org/covid-19/covid-news/>

Vaccination & Transmission Level Status Update by Sub-Region

- As of July 16, YKHC has vaccinated 14,997 unique individuals throughout the YK Delta.
- For information on how Transmission Level Status affects community gatherings and activities download the Community Lockdown Advisory Update here: <https://www.ykhc.org/wp-content/uploads/2021/05/051721-community-guidance.pdf>
- For communities that have agreed to publish vaccination data, these are the percentage of vaccinated individuals of the total population who have received their vaccine. Villages showing no percentage have not given permission to report that information, but are included as being within their sub-region.
